## PROFILE

Self-driven and object-oriented programmer with a strong passion for building scalable backend systems and efficient full-stack applications. Experienced with Java, databases, and system architecture, with hands-on practice creating high-performance solutions and clean, maintainable code.

## EDUCATION

- Professional Bachelor - Applied Computer Science** 2024 - 2027  
System and Network Management | PXL-Digital Hasselt
- STEM + Applied Sciences + Math** 2018 - 2024  
Sint-Martinusscholen | Herk-de-Stad

## WORK EXPERIENCE

- Colruyt Group (Sint-Truiden)** 2022 - PRESENT  
Student Job
- Operated the cash register and assisted customers efficiently.
  - Maintained product availability by restocking shelves and managing presentation.
  - Replenished stock in the walk-in fridge, applying FIFO to ensure freshness and reduce waste.
- Projects** 2020 - PRESENT  
Lead Developer
- Built custom Java plugins and backend systems for high-performance Minecraft servers, supporting 120+ concurrent users with stable TPS and low CPU usage.
  - Optimized gameplay mechanics, data flows, and server performance for large multiplayer environments.
  - Worked with MongoDB, SQL, Docker, and Linux for data handling and deployments.
  - Used Git/GitHub for version control, issue tracking, and releases.
  - Gathered requirements and collaborated with server owners to deliver tailored features.
